

Choose one of your favorite websites and identify 5 different HTML elements used on the website. Make sure to include the URL in your submission.

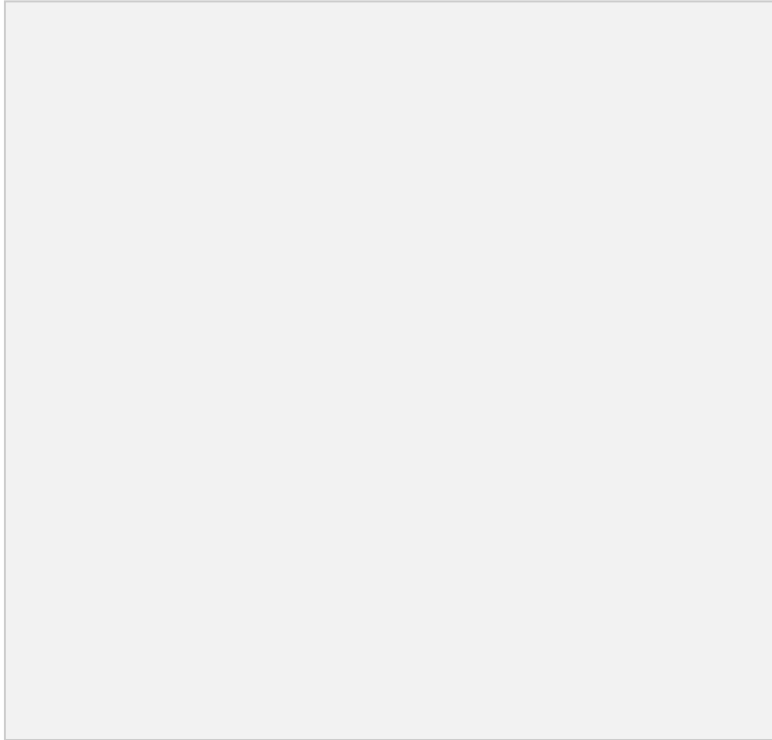

Website: <https://www.reddit.com/>

1. Form / Input element:

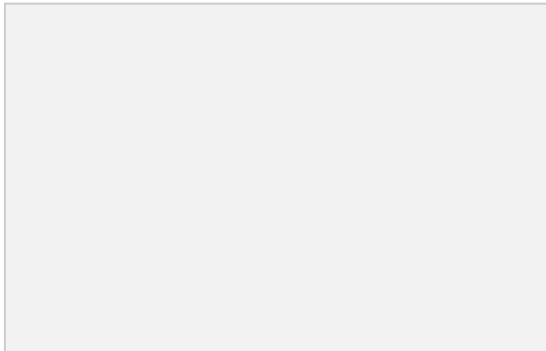

2. Button in a div element:

3. List of anchor tags / link elements

4. Img elements

5. A lot of div elements. Reddit is a good example of not having semantic code

What is a highlight of what you have learned this week?

Semantic Meaning. When writing code doing it in a way that uses semantic meanings so that your website is accessibility friendly and easier for other programmers to read and work on.
